

## ILLINOIS ENVIRONMENTAL PROTECTION AGENCY

## MEMORANDUM

DATE: December 5, 1980

TO: Division File

FROM: Brad Benning

SUBJECT: COOK COUNTY - LEMONT/J.J. SHULTZ      LPC-03116205

EPA Region 5 Records Ctr.

343505

On December 2, 1980, a compliance inspection was conducted at the J. J. Schultz Co. to determine their progress in cleaning up the facility. I was accompanied by Mary Drake-Enforcement Division and Larry Lai-Division of Water Pollution. We met with Mr. Schultz and his attorney and discussed his plans for cleaning up the area.

Mr. Schultz has been removing empty drums from his facility and sending them to Meyers Brothers. He also had Fred's Waste Oil remove some oil from several drums. We advised Mr. Schultz to segregate and hold all drums that contain waste material, until it can be identified and properly manifested. Five samples from drums that appeared to contain oil, and one soil sample from the area where the drainage hole was excavated. Mr. Schultz can continue to remove empty drums, but no waste material may leave the site until it is properly permitted and manifested.

Analysis of the soil sample will determine if the excavated earth will have to be removed or if it can be reused in filling the dug-out area.
